

Tranquilliser Pistol Mod. RD206-AIR

The Alternative.

plug-in barrel system with adapter

The economic alternative

In this tranquilliser pistol, the RD206-AIR pistol model is similar to the RD206-CO2 model, but the pressure is built up by air pump which is included in the delivery. Instead of the CO2 pressure supply, the pistol has a push-in coupling for the air pump.

Benefits

The use of an air pump is economic as no CO2 cartridges are required.

Because air pressure also has better characteristics than CO2 at very low temperatures, the use of an air pump or of the TeleDart® PCS200 compressed air system (see accessories) is practical, especially in polar regions.

Long-term guarantee

The exclusive use of high quality and corrosion free materials enables a functional guarantee of 20 years for this pistol.

Technical data:

Weight	Approx. 0,9 kg
Overall length with barrel	90 cm
Material	Aluminium
Barrels / Syringe volumes	Plug-on barrel system with adapter Calibre 11 (1 ccs to 5 ccs) Calibre 13 (5 ccs to 20 ccs) Calibre 16 (1 ccs to 20 ccs)
Short barrel	Available
Range	1 m – 30 m
Standard sight	Backsight / front sight
Pressure build-up	Airpump
Pressure control	Continuous (0 – 10 bar)
Safety striker	Yes (pin retainer)
Safety valve	Yes
Pressure relief valve	Yes
Kinetic energy	> 7.5 joules

Scope of delivery:

Complete set: RD206-AIR with barrel of choice and air pump with connector, functional carrying bag, darts syringes, injection needles, filling and cleaning kit
